PROJECTS

Weather Forecasting App

- Weather Forecasting App created with HTML, CSS, Node JS, Handlebars and Express JS. Tells the Temperature in Degrees Celsius across different States in India. Made with the help of Open Weather API and changes data, images dynamically according to the Temperature in different areas. Github link: <https://github.com/Aryan2727-debug/Weather-Forecasting-App>.

Notes App

- Notes App created with the help of HTML, CSS and React JS. It allows us to write notes in text-areas which can be selected according to our choice of color from the palette. Multiple notes can be added and deleted from the App. The date and time of note creation is also displayed. The content of the notes is saved with the help of Local Storage. Github link: <https://github.com/Aryan2727-debug/react-notes-app>.

Netflix Clone

- It is a Netflix Clone created with the help of HTML, CSS and JavaScript. It has many sections like the Login Page, Sign-Up Page, Payment Gateway Page, Home Page and My List Page. It is hosted with the help of Github Pages and Firebase Hosting. On signing up, the details of the user are stored in the Back-End with the help of Firebase Cloud Storage Authentication. Github link: <https://github.com/Aryan2727-debug/Netflix-Clone-Public>.
